

## News Release

### OMEGA Introduces Their Latest ECHO Upgrade Kit

**Douglasville, Georgia – SEPTEMBER 15, 2015** – Omega Research and Development Technologies, Inc. added the new ECHO-5 to their line of ECHO Two-way upgrade kits. The ECHO-5 kit includes a Two-way ECHO antenna, harness, and the new #159 Two-way LCD controller. This kit allows you to add Two-way operation to any ECHO compatible Omega system.

The redesigned #159 controller features a larger LCD screen with easier to understand graphics. The laser engraved logo wraps the controller like a tattoo, and texturing on the rear offer the feeling of stitched leather. Combined, these artistic details give the controller an elegant look.

This new #159 controller is much smaller & thinner than previous Two-way controllers. The buttons have been arranged for easy day-to-day operation with enhanced icons showing primary functions and sub functions, eliminating guess work and helping the user get maximum functionality from the system.

#### **About Omega:**

Omega Research & Development Technologies has been an innovative leader in the vehicle security industry for over 40 years. Since its founding in 1971, Omega's product line has diversified to include remote start modules and other vehicle accessory products. Omega's most recent product offerings include the exciting new technologies of telematics, wireless and databus integration.

With the vision of the founder, Kenneth Flick, guiding the company, auto security systems remain the central focus of Omega Research & Development Technologies. In 1995, Omega became the only company in the keyless entry arena with a technology designed to prevent crime due to unauthorized transmitter access to vehicle systems. The patented technology, **Unauthorized Transmitter Alert**, promises to revolutionize the industry. Consumers can now have instant knowledge of any unauthorized access to their keyless entry systems. Most of the product lines manufactured by Omega are equipped with Unauthorized Transmitter Alert technology.

Omega's mission, as it was over four decades ago, is to provide reliable, leading-edge security and automotive accessory products at a competitive price.
