New LED Strobe Kit Now Available

DOUGLASVILLE, GEORGIA – SEPTEMBER, 22, 2015 – Omega Research and Development Technologies, Inc. is replacing the long term STR-242-LED strobe kit with a more universal STR-F09 strobe kit. This new kit includes 2 White LED strobe lightheads, a controller with multiple pattern options, and a lighthead flange mounting kit.

This system retains all the essential features of the previous model such as rugged LED strobe lightheads and a small, easy to wire controller, and adds more strobe pattern selections and brighter lightheads. The new STR-F09 lighthead can be rear-mounted into most vehicles' headlight or marker light housing. The included flange kit can alternately be used to secure the lighthead to any interior or exterior panel.

As with the previous kits, you can install multiple STR-F09 kits and tie them all together to create a fully synchronized 4, 6, or 8 light lighthead systems.

About Omega:

Omega Research & Development Technologies has been an innovative leader in the vehicle security industry for over 40 years. Since its founding in 1971, Omega's product line has diversified to include remote start modules and other vehicle accessory products. Omega's most recent product offerings include the exciting new technologies of telematics, wireless and databus integration.

With the vision of the founder, Kenneth Flick, guiding the company, auto security systems remain the central focus of Omega Research & Development Technologies. In 1995, Omega became the only company in the keyless entry arena with a technology designed to prevent crime due to unauthorized transmitter access to vehicle systems. The patented technology, **Unauthorized Transmitter Alert**, promises to revolutionize the industry. Consumers can now have instant knowledge of any unauthorized access to their keyless entry systems. Most of the product lines manufactured by Omega are equipped with Unauthorized Transmitter Alert technology.

Omega's mission, as it was over four decades ago, is to provide reliable, leading-edge security and automotive accessory products at a competitive price.
