

Omega releases Linkr app update for iOS/Android

DOUGLASVILLE, GEORGIA – September 11, 2017 - Omega Research & Development Technologies, Inc. has released a significant app update for the Linkr mobile control & tracking telematics platform, for both Android & Apple ios.

The new app update improves the device setup wizard that supports all Linkr models. This will provide for faster & simpler Testing/Activations of Linkr units. LG V20 compatibility has been added, as well as for the ultra-high resolution Samsung S8 & S8+. Other general improvements will enhance the platform's operation.

The LINKR-M1 is not your typical smartphone control interface. Service plans start at \$36.96/year and all plans include GPS tracking! 3 dedicated analog outputs, 4 dedicated analog inputs, a dedicated data port interface for plug-n-play install with any Excalibur 60 or 70 series remote start. It also plugs into any Omegalink t-harness remote start kit. Get full product details at www.omegalinkr.com.

Linkr can also be used as a low cost alternative to home alarm monitoring by using its “alert only” mode. Just tap it into the alarm panel's siren output wire, and you will receive alarm trigger notifications. The Omega Linkr app is available for iOS and Android users. Just search “Omega Linkr” in your app store.

As a companion to the smartphone app, the installer test activation tool can be found at the www.omegadealer.com dealer portal. All setup, activation, & testing can be done right from your smartphone. No more need to run back and forth from your computer! Register today to get started!

About Omega:

Omega Research & Development Technologies has been an innovative leader in the vehicle security industry for over 40 years. Since its founding in 1971, Omega's product line has diversified to include remote start modules and other vehicle accessory products. Omega's most recent product offerings include the exciting new technologies of telematics, wireless and databus integration.

With the vision of the founder, Kenneth Flick, guiding the company, auto security systems remain the central focus of Omega Research & Development Technologies. In 1995, Omega became the only company in the keyless entry arena with a technology designed to prevent crime due to unauthorized transmitter access to vehicle systems. The patented technology, **Unauthorized Transmitter Alert**, promises to revolutionize the industry. Consumers can now have instant knowledge of any unauthorized access to their keyless entry systems. Most of the product lines manufactured by Omega are equipped with Unauthorized Transmitter Alert technology.

Omega's mission, as it was over four decades ago, is to provide reliable, leading-edge security and automotive accessory products at a competitive price.
