1. Connect the cable marked **“TO XM RADIO”** on the FM Direct adapter into the XM antenna in jack on the XM vehicle dock or on the side of the receiver.

4. Connect the XM antenna into the jack marked **“XM ANT”** located on the side of the FM Direct Adapter.
5. Your FM Direct Adapter receives power from your XM radio receiver. No additional external power source is required.

NOTE: 1. *The FM antenna connector used to connect the FM Direct Adapter to the vehicle audio/stereo system may require an additional antenna adapter depending on the type of vehicle. Professional installation is recommended.*

2. *The Audiovox FM Direct Adapter may be tie-wrapped to existing wire harnesses or other under-dash structures. The adapter should be constrained in some way to help prevent it from causing rattles and other noise, or chafing to vehicle wiring.*

Turning on the Audiovox FM Direct Adapter

With the ignition on, the FM Direct Adapter is always on in a standby condition. When you turn on your XM radio receiver, the adapter will automatically switch the vehicle FM signal input from your FM antenna to the XM Audio signal.

Changing the Transmitting Frequency

The FM Direct Adapter allows you to input the signal from your XM Radio receiver directly into your vehicle's radio.

You can select the frequency on which the broadcast is sent from your XM radio receiver controls. (See your XM radio user manual for more information.) Set your vehicle's radio to the same FM frequency as the one selected for your XM radio receiver.
