# Using the Remote Control

## The Buttons on the Remote Control

**(0-9) Number Buttons** Enter channel numbers and time settings. Also used in the TV menu to make selections. **Analog inputs:** To enter a one-digit channel, enter a zero first. To enter a two-digit channel, press the two digits. To enter a three-digit channel, press and hold the 1 button until 1 and two dashes (—) appear, then add the second two digits. Example: to tune to channel 123, press and hold 1 until 1— appears, release the 1 button and then press 2 and 3. **Digital inputs:** Enter the channel number, press the right arrow button and enter the subchannel numbers. Press OK.

**ANT•CABLE** In TV mode, this button switches between Antenna and Cable Input. When tuned to an input, press to go back to the most recently used tuner (Antenna or Cable Input).

**Arrows (up, down, left, right)** Used to move through the on-screen menus. The right arrow (Zoom+) and left arrow (Zoom-) buttons on the remote change the TV's screen format (when no menus are on screen).

**AUX** Places the remote in auxiliary mode to operate a device (such as a cable box, satellite receiver, VCR or DVD player etc.) you've programmed to work with this button. If Auto Tuning is enabled, pressing the AUX button turns on the TV and tunes to the corresponding Video Input Channel for RCA devices. AUX by default is programmed for an RCA VCR. This button lights when you press a valid button in AUX mode (see *Modes of Operation* on page 25 for more details).

**CH + or CH -** Scrolls up or down through the channel or input list. Press once to change the channel up or down; press and hold to continue changing channels. In DVD mode (if programmed), these buttons work as chapter advance or chapter reverse buttons with some DVD players.

**CLEAR** Removes any menu or display from the screen.

**DVD** Places the remote in DVD mode. If Auto Tuning is enabled, pressing the DVD button turns on the TV and tunes to the corresponding Video Input Channel for RCA devices. This button lights when you press a valid button in DVD mode (see *Modes of Operation* on page 25 for more details).

**FORMAT** Changes the current video screen format. Format control is not available for digital 16:9 broadcasts.

**FREEZE** Freezes the entire screen. When watching TV, freezes the picture until you press any button on the remote to resume normal TV viewing. The FREEZE feature automatically times out after a short time. Please note that when you "unfreeze" you go back to live programming (skipping any programming that occurred during the freeze).

**Note:** The FREEZE feature does not work on signals from the DVI-HDTV, CMP1, or CMP2 inputs in progressive scan (480p) or HDTV (1080i) modes. It also does not work on digital channels.

*Do not use the Freeze feature for an extended period of time. This can cause the image to be permanently imprinted on the picture tube. Such damage is not covered by your warranty. Press any button to unfreeze the picture at any time.*

**GO BACK** Returns you to the previous channel.

**GUIDE** Displays the *Channel Guide* menu.

**INFO** Displays the Channel Banner with channel and viewing information. Press again to remove the banner.

# Using the Remote Control

**INPUT** Press to toggle through the available input sources (VID1, VID2, FRNT, CMP1, CMP2 and DVI).

**MENU** Displays and clears the *Main Menu*.

**Note:** If you've just turned on the TV, the digital input takes some time to become available (usually about 25 seconds). While it's getting ready, you won't see the items related to the digital input in the menus. These items will show up once the digital tuner is ready.

**MUTE** Reduces the TV's volume to its minimum level. Press again to restore the volume. To program this button to work with devices connected to your audio system, follow the instructions in the *Volume Punchthrough Feature* section on page 26.

**OK** When a menu item is highlighted, press OK to select the item.

**ON•OFF** When in TV mode, turns the TV on and off. If in another device mode (SAT•CABLE, AUX or DVD) and programmed, will turn the device on and off.

**REVERSE, PLAY, FORWARD, RECORD, STOP, PAUSE** If programmed, provides transport control for some remote-controllable VCRs, DVRs, CD and DVD players etc.

**Important:** The RECORD button has a safety feature that requires you to press it twice.

**SAT•CABLE (Satellite•Cable)** Places the remote in SAT/CABLE box mode. If Auto Tuning is enabled, turns on the TV and tunes to the satellite or cable box Video Input Channel for RCA devices. This button lights when you press a valid button in SAT•CABLE mode (see *Modes of Operation* on page 25 for more details).

**SUB CH (Subchannel)** When entering a digital channel that has a subchannel, press this button to access the subchannel entry field. Enter the subchannel and press OK to tune to the channel.

**TV** Places the remote in TV mode. Turns on the TV and tunes to the last-viewed TV channel or input. This button lights when you press a valid button in TV mode (see *Modes of Operation* on page 25 for more details).

**VOL - or VOL +** Decreases or increases the TV's volume. To program this button to work with devices connected to your audio system, follow the instructions in the *Volume Punchthrough Feature* section on page 26.

## Tip

To turn off all the RCA devices that are connected to the TV, press ON•OFF twice within two seconds.

This feature works with most RCA products.

## Note:

The SAT•CABLE, AUX and DVD buttons operate most RCA products.

Device Buttons

## Programming the Remote to Operate Other Devices

The universal remote can be programmed to operate many brands of remote-controllable VCRs, audio devices, DVD players, cable boxes, satellite receivers and other devices. In addition to being programmed to operate your television, it's already programmed to operate most RCA devices.

**Note:** The TV button can't be programmed on this remote to control any device; it controls only this TV.

Continues on next page...

# Using the Remote Control

You'll use these buttons for Direct Entry.

**Important:** The remote may not be compatible with all models of all brands of devices. It also may not operate all functions of your device.

## Find Out If You Need to Program the Remote

To determine whether the universal remote needs to be programmed to operate one of the devices connected to your TV, such as a DVD player, do the following:

1. Turn on the device (in this example, a DVD player).
2. Point the remote at the device.
3. Press the corresponding device button (in this example, DVD).
4. Press ON•OFF to see if the DVD player responds. If the DVD player doesn't respond, you need to program the remote to operate it.

## Programming the Remote

There are three ways to program the remote control to operate other devices: *Direct Entry*, *Manual Code Search* and *Automatic Code Search*. If you have recently purchased the device you want to control or if the device has many codes, you might want to try the manual code search first. The codes in the code list at the end of this chapter are programmable for any of these device buttons (SAT•CABLE, AUX or DVD) on the TV's remote.

### Using Direct Entry

1. Turn on the device you want to control.
2. Look up the brand and code number(s) for the device on the code list at the end of this section.
3. On your remote control, simultaneously press and hold the ON•OFF and MUTE buttons (approximately 3 seconds) until a device button remains lit. Then release the buttons.
4. Press and release the device button (SAT•CABLE, AUX or DVD) you want to program.
5. Enter a three digit code from the code list.
6. To test the code you've programmed for that device button, point the remote at the device and then press ON•OFF to see if the device responds to the remote control.

If the device turns off, you've entered the correct programming code for your device. (You might want to circle the code for future reference). If the device doesn't turn off, repeat these steps until you've tested all codes for your device's brand or try to run a manual code search.

### Using Manual Code Search

**Note:** Try the direct entry method first, or if you want the AUX button to operate your DVR, for example, enter the first code from the DVR code list. (You save time by telling the remote what type of device you want to program). Now proceed with the following steps.

1. Turn on the device you want to control.
2. On your remote control, simultaneously press and hold the ON•OFF and MUTE buttons (approximately 3 seconds) until a device button remains lit. Then release the buttons.

# Using the Remote Control

---

3. Press and release the device button (SAT•CABLE, AUX or DVD) you want to program.
4. Repeatedly press and release the ON•OFF button, watching for the device to respond. If it does turn off, press and release the OK button within 3 seconds to save the code. If you accidentally passed the code before saving it, press the left arrow button to backtrack through the codes; then use the right arrow button to go forward through the codes again.

When all codes have been searched, the device button flashes 3 times, then the remote exits manual code search and returns to normal operation.

## Using Automatic Code Search

1. Turn on the device you want to control.
2. On your remote control, simultaneously press and hold ON•OFF and MUTE (approximately 3 seconds) until a device button remains lit. Then release the buttons.
3. Press and release the device button you want to program.
4. Press and release the ON•OFF button once. There is a delay of approximately 6 seconds before the remote starts the code search.

The device buttons blink each time the remote control sends a code to test for your device.  
Keep pointing the remote at the device.

5. Once the device turns off, quickly press the OK button to save the code.
6. If you accidentally passed the code before saving it, press the left arrow button to backtrack through the codes; then use the right arrow button to go forward through the codes again.

When all codes have been searched, the device button flashes 3 times, then the remote exits automatic code search and returns to normal operation.

## How to Use the Remote After You've Programmed It

Once the remote has been programmed successfully, you are ready to use it to operate your devices.

To Operate the Device:

1. Press the appropriate device button (SAT•CABLE, AUX, DVD) to set the remote to control the device.
2. Press ON•OFF to turn the device ON or OFF.
3. Use the remote buttons that apply to that device.

**Notes:** *The remote control may not be compatible with all brands and models of devices.*

*Some of the remote buttons might operate differently for other devices, especially when you're using another device's menu system.*

## Modes of Operation

Because this universal remote can control several different devices (DVD player, VCR, cable box, etc.) it uses operational modes triggered by the device buttons. For example, if you want the remote control to operate the TV, press the TV button to put the remote into TV mode. If you want the remote to operate the DVD player, press the DVD button.

The button corresponding to the mode the remote is in lights up when you press any button that works in that mode. For example, if you're in TV mode and you press the VOL+ button, the TV button lights up. This tells you that the command to increase the volume is being sent to the TV (and not the satellite receiver, for example).

# Using the Remote Control

---

## Volume Punchthrough Feature

You may find this feature helpful if you've connected an audio/video receiver (A/V receiver) or amplifier, and you want to use the TV's remote control to operate the volume for a device that is connected to the audio/video receiver. An example follows:

Let's say you've connected your DVD player to your audio/video receiver. You've also programmed your TV remote control to operate your DVD player. Since the DVD player sends its volume through the audio/video receiver, you would have to bounce back and forth between two remote controls: the A/V receiver's remote to adjust the volume and the TV's remote control to operate the DVD player.

The Volume Punchthrough feature eliminates the need for you to use two remote controls and saves a button press when you're using the TV remote to adjust the volume. In effect, you are telling the TV remote to retrieve and send volume commands from the A/V receiver whenever the TV remote is in DVD mode.

Therefore, after you've successfully set up the Volume Punchthrough feature, whenever the TV remote is in DVD mode (press the DVD button) and you want to adjust the volume, you only have to press the VOL +, VOL- or MUTE buttons. Follow the instructions below to set up Volume Punchthrough.

**IMPORTANT:** First, you must program a device button (SAT•CABLE, DVD, AUX) on the TV's remote control to operate your audio receiver or amplifier. Go to page 24 for instructions. If you can't program this remote to operate your audio receiver, Volume Punchthrough won't work.

While setting up Volume Punchthrough, it's best to point the remote away from other devices.

1. On your remote control, simultaneously press and hold the ON•OFF and MUTE buttons (approximately 3 seconds) until a device button remains lit. Then release the buttons.
2. Press and hold the MUTE button until the device button blinks off, then release the MUTE button.
3. Press and release the device button that you programmed to operate the audio device (receiver or amplifier).
4. Press and release the MUTE button.
5. Now, test it by turning on your audio system.
6. Turn on the device that is connected to the audio system (a satellite receiver, for example).
7. Put the TV's remote in SAT mode by pressing the SAT•CABLE button.
8. The volume from the audio system should increase or decrease when you press the VOL+ or VOL- buttons.

## Deleting ALL Volume Punchthrough Commands

To delete all programmed Volume Punchthrough settings and return the remote control back to the factory defaults:

1. Simultaneously press and hold the ON•OFF and MUTE buttons (approximately 3 seconds) until a device button lights.
2. Release the ON•OFF and MUTE buttons (the device button stays lit).
3. Press and hold the MUTE button (approximately 3 seconds) until the device button blinks off, then release the MUTE button.
4. Press and release the MUTE button (the device button light turns off).
5. The remote returns to normal operation and Volume/Mute control.

# Using the Remote Control

## Using the INPUT Button

- Repeatedly press the INPUT button to scroll through the available input sources until you find the input associated with the device (such as a DVD player or cable box) you want to view.
- Once you find the input source you want, stop pressing INPUT.
  - If you tune to VID1 and your DVD player is connected to that input, you will be able to view your DVD player. To play, stop, or rewind the DVD using the remote that came with your TV, you must first press the (device button) SAT•CABLE, DVD or AUX button (whichever one is programmed to the DVD player) to put the remote control in DVD mode.

There are other ways of selecting a Video Input Channel:

- Program the device buttons (DVD, SAT•CABLE etc.) on the remote control to automatically tune to the corresponding Video Input Channel when pressed. For more details on Auto Tuning, see Chapter 3.
- When viewing an input, press ANT•CABLE, GO BACK or INPUT to go back to viewing channels or use the number buttons to enter the channel number.

## Remote Code List

The codes below are programmable for any of these device buttons (SAT•CABLE, AUX or DVD) on the TV's remote.
